## CASE STUDY

### About Cynergy Composites Inc.

Cynergy Composites Inc. is a world leader in composite component development. The customer base of Cynergy Composites includes the elite drag racing teams and the progressive leaders in the industrial composites applications. Since 2001, Cynergy Composites has been a world leader in composite motorsports racecar body manufacturing with many team wins in the highly competitive ADRL league. Cynergy Composites will develop patterns, hi-temp tooling and difficult desired composite layouts with proficiency. The physical attributes of the structural tubing used by Cynergy Composites comes from unique design for stiffness stemming from high strength, lightweight core cap-tured between inner and outer carbon fiber composite shells.

### What we do for Cynergy Composites

Performance Plus handles the importing of fiberglass body pieces from Canada into the United States for Cynergy Composites. Cynergy Composites, as a manufacturer, regularly imports automotive body panels into the United States and requires assistance with freight rates for getting their products safely to their US consumers, and Performance Plus makes this possible on a monthly basis.

“ Our products are shipped around the world, and we have required the services of many shipping companies over the years. Our Operations Director, Sue Tuckey, reports to me that she has never had the high level of satisfaction that she experiences with Performance Plus. Ms. Tuckey’s mandate is to secure shipping companies that can provide the peace of mind transportation for our products at a price that is reasonable. Sue has been very pleased with the professional and dedicated measures that have been consistently demonstrated by the representatives at Performance Plus. In the event that our client representative is unavailable, we are forwarded to another rep to handle our account activity immediately. Customers demand quick turn-around of our products and we need to align ourselves with organizations that share our commitment and demonstrate a willingness to be an industry leader by exercising these standards consistently; we are very pleased to say that we have found that industry partner in Performance Plus. It would be our pleasure to continue to benefit from the world class service from Performance Plus.”
